

Disciplinary Core Idea

Develop a scientific explanation of how natural selection plays a role in determining the survival of a species in a changing environment.

*Create an informational brochure, video advertisement, poster, music video, or presentation that constructs a scientific explanation for **how natural selection determines survival in a changing environment.***

Include the following terms:

extinction, adaptation, phenotype, traits, evolution, stability and change, structure and function, natural selection, extinction, descent with modification, common descent

Science and Engineering Practices

Constructing Explanations and designing solutions

Cross-Cutting Concepts

Stability and Change
